Cover Letter

I am writing to express my interest in the Data Analyst position at Elisa. My ever-growing and adaptable problem-solving skills, coupled with a solid foundation in spatial data, econometrics, and data science, align well with the role's requirements. I have hands-on experience developing creative and analytical solutions, particularly data processing and visualisation.

The job requirements for experience with databases and data pipelines align with my skill-set and experience in taking ownership of projects and ensuring their successful completion with a service-minded attitude. I believe my strong visualisation skills and familiarity with graphic design and academic communication will be valuable to your team. Moreover, my self-driven nature and accountability in managing projects are qualities you have identified as essential for success.

I am eager to contribute to your projects and look forward to the opportunity to discuss my application further. I am available for an interview at your earliest convenience.

Sincerely yours,

Babäk Firoozi Fooladi
