

## Cover Letter

---

Dear Matti,

I am writing to express my enthusiastic interest in the Project Expert position at Orion Pharma. I have experience in industrial environments, data stewardship, and research project management, along with a strong interest in technology, IT, and system design. I believe my can-do attitude and service-mindedness would be valuable assets to your team.

My background includes actively addressing technical debt, refining data pipelines, and implementing comprehensive unit tests, which demonstrates my dedication to quality assurance and system stability. I am confident in my ability to design and execute the necessary tests to verify that implementations meet both business requirements and high-quality standards.

I am recognised as a patient, collaborative, and solution-orientated individual. My service-minded approach enables me to foster strong relationships and efficiently manage daily project activities in collaboration with the Project Manager. I appreciate your time and look forward to discussing how my expertise can contribute to your digitalisation projects.

Sincerely,

Babak Firoozi Fooladi
