Data Analytics Engineer | Data Scientist

Service-minded data scientist and Ph.D. Candidate with extensive experience in designing, optimizing, and deploying complex data models and solutions. My expertise includes Data analysis, data transformation (ETL/ELT), extracting structured data using RAG, and performing econometric, machine learning and statistical modeling. I have successfully engineered efficient data pipelines, optimized SQL queries, resolved technical debt, and improved performance through migration and optimisation of the data models. I am proficient in Python, R, and SQL with experience of creating data visualizations and deriving forecasts and inference through interprating the results of statistical and ML models.
